

M2-EasyScan™ Biometric Reader

The use of biometrics for student identification in school cafeterias is increasing nationwide. This low maintenance, affordable option for identification ensures reliable results in high throughput settings such as school meal serving lines and includes audio/visual confirmation of a successful read. Total enrollment time is less than 15 seconds per student. This accurate, efficient means of identification will produce benefits for schools, staff, parents and children.

Biometrics eliminate the need to create ID cards or replace ones that have been lost or stolen. Students no longer need to remember PIN numbers, just their fingers!

FEATURES AND BENEFITS

- Eliminates lost or stolen ID cards
- No more forgotten PIN numbers
- **NEW!** Auto-On feature detects the presence of a finger on the sensor
- Reads the fingerprint of smaller fingers
- Compact, ergonomic design ensures consistent image quality

technical specifications

CATEGORY	DESCRIPTION
Interface	USB 2.0
Type	Optical
Calibration	N/A (self-calibrates upon connection with USB port)
Resolution	500 DPI
Warranty	2 year mechanical defect
Certifications	FCC, CE

SYSTEM REQUIREMENTS

- Windows® XP
- 512 MB RAM or greater
- 1.2 GHz CPU or greater

NETWORK REQUIREMENTS

- Windows® Domain User Authentication
- Hard-wired Connection

Frost & Sullivan selected M2SYS for demonstrating technological superiority through its one-of-a-kind Bio-Plugin™ solution.

Dimensions

Width 1.06"
Length 1.57"
