for a New School Year...

NUTRIKIDS® Menu Planning Update Series 2009-2010

Each and every school year we incorporate the most widely requested features and enhancements into NUTRIKIDS Menu Planning & Nutritional Analysis. This school year is no exception. We've carefully chosen a variety of features that will enrich your NUTRIKIDS experience and benefit your food service operation. Don't miss out on this exciting opportunity. Order your updates today!

INCLUDES 1 YEAR OF PRODUCT SUPPORT

Your update purchase includes 1 year of product assistance and technical phone support from our award winning NUTRIKIDS team.

INCLUDES 1 YEAR OF PRODUCT UPDATES

Here's a taste of some of the new features and enhancements for NUTRIKIDS Menu Planning to be released in the 2009-10 school year. NUTRIKIDS Menu Planning & Nutritional Analysis software is USDA-approved for use in implementing NSMP and in conducting nutrient analyses that meet SMI requirements.

USDA CN14

Includes the upcoming release of the Child Nutrition Database CN14.

Menu Engineering

Allows you to make tentative ingredient substitutions and then run a menu analysis to see where cost and nutritional values may be impacted. Create "what if" scenarios to find out how new products will affect your bottom line and your analysis.

Auto-Calculate Shortages & Leftovers

When you enter your actual production quantities after meals are served, the program will automatically calculate your shortages and leftovers.

Auto-Reminder of Past Quantities Used

View previously planned quantities for a particular menu item. Also compare what you planned in the past against what your actual count was.

FitFuture Newsletters Volume 3

Access nine brand new issues of FitFuture, a parent newsletter designed to help promote good nutrition and healthy living for families.

Additional Features

- ✓ Extra Default Menus
- ✓ Updated Reports
- ✓ More Backup Options
- ✓ Upgraded Security
- ✓ and more...
