

NUTRIKIDS® Point of Sale Standard Edition Server Requirements

NOTE: Dedicated Windows Server not required

Server Platform

Operating System: Microsoft® Windows® Server 2003 or 2008 (32-bit/64-bit)

Hardware

Processors: Dual 2.5GHz single-core processors (or greater)
Memory: 4GB (or greater)
Hard Disk: Raid Array (recommended)*
Disk Space: 20GB free (variable)*

Software

Antivirus Software: Capable of protecting Access databases
Archiving Software: Capable of backing up Access databases
Client Licenses: Microsoft Windows Network (CALs)**

- * Storage space requirements can vary greatly from district to district. Database backups are created daily, and while they are compressed, in larger districts each backup file will occupy a considerable amount of space. Regardless of the disk space requirements, we highly recommend that the server utilize RAID technology for its hard drive configuration to protect against hard drive failure.
- ** One Windows Network CAL is required for each software program installation (POS Manager, and POS Serving Line). The total quantity of CAL's required will be dependent on your implementation.
